Preface

It is a great honor for me to greet the participants from all over the world to the international symposium on

The Atmospheric Correction of Satellite Data and Its Application to
Global Environment,

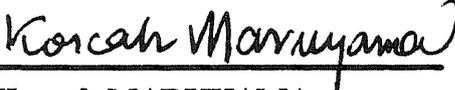

and the associated workshop on

The Accuracy of Optical Thickness Derived from Lidar Observations.

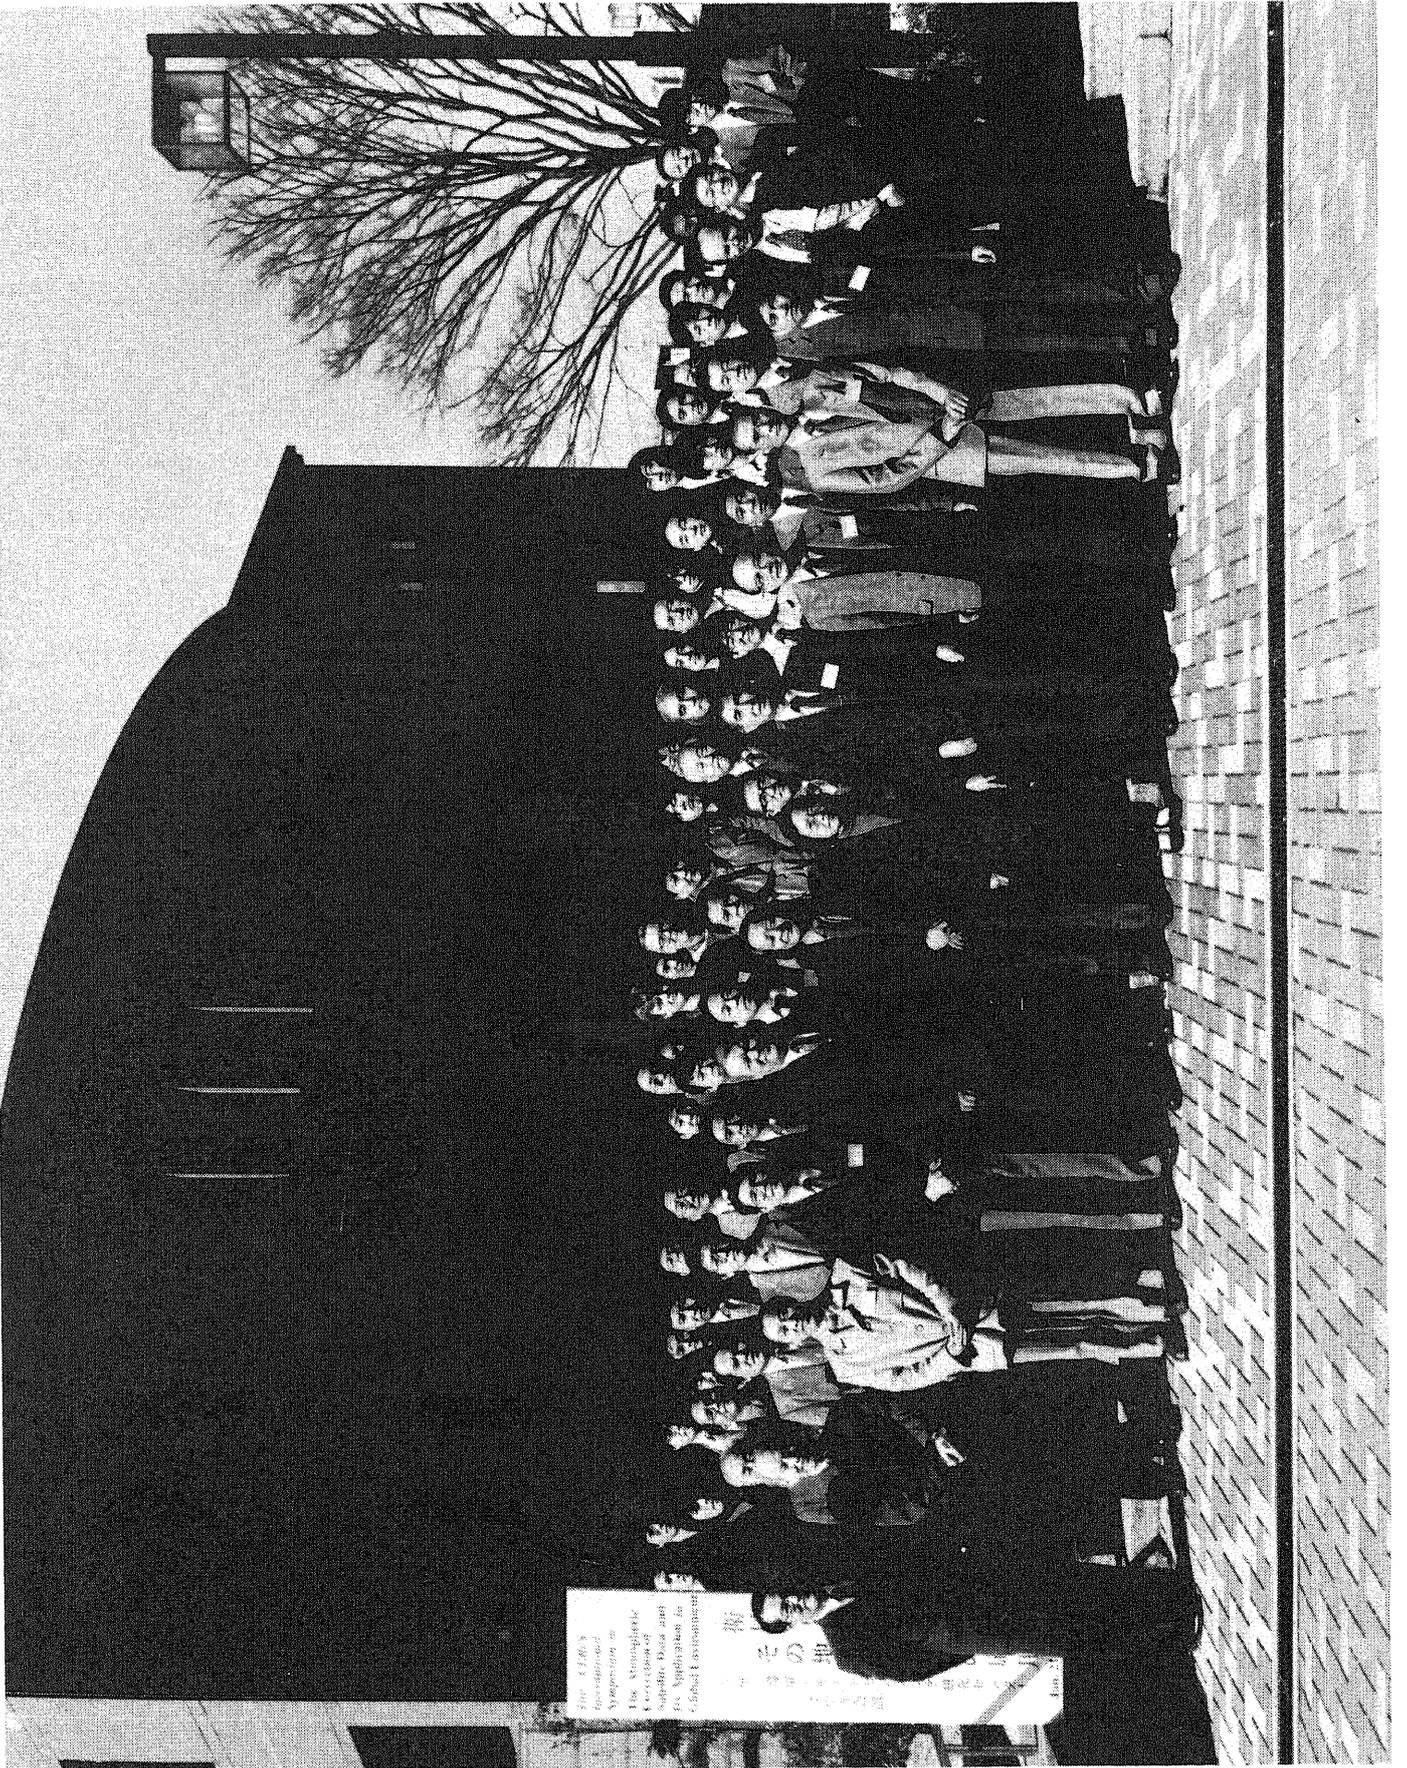

Recently, world-wide abnormal weather is a hot topic. Last week we had a large amount of snowfall in Tokyo and Chiba area. This might be one of the unexpected outcome of such an effect. Also in tropical area its influence is conspicuous. In this symposium we have a special session on 'Indonesian Forest Fire Impact' from the viewpoint of the satellite observations. It is widely believed that the aerosol particles emitted from the forest fire greatly influence not only the local climate but the global warming.

Under these circumstances I believe it quite suitable to have a symposium in which a number of distinguished scientists take part from around the world. The discussions in this symposium will produce fruitful results toward the future study of global environment.

I would like to express my respects to Professor Tomio Asai and other colleagues who promoted this symposium. At the same time I hope every participant attending here could take this opportunity to share scientific ideas with each other, and stay comfortably in Chiba.

The international symposium on
The Atmospheric Correction of Satellite Data and
Its Application to Global Environment

January 21-23, 1998, Chiba University

CONTENTS

I. Optical Properties of the Atmosphere

New Breakthrough in Far-wing Line Shapes : Application to CO ₂ and H ₂ O <i>R.H. Tipping and Q.Ma</i>	3
Measurement of Spatial Coherence of the Light Influenced by Turbulence <i>Hiroshi Okayama and Li-Zhong Wang</i>	11
Evaluation of Optical Properties of Atmospheric Aerosols Based on Chemical Characterization <i>Sachio Ohta and Naoto Murao</i>	17
Line Strengths and Half-widths of CO ₂ , CO, and N ₂ O in the Near Infrared Region at Room Temperature <i>Masashi Fukabori, Tadao Aoki, and Teruo Aoki</i>	25

II. Remote Sensing of Aerosol over Land and Ocean

(Invited Paper)

An Inversion Algorithm for Simultaneous Determination of Vegetation Reflectance and Aerosol Optical Depth Using Satellite Radiance Data <i>Qiu Jinhuan</i>	31
Day and Night Detection of Volcanic Clouds and Aerosol by NOAA/AVHRR Data <i>K.Kinoshita, N.Iino, I.Uno, A.Mori, and J.Kohno</i>	37
Polarimetric Investigation of the Aerosols over the Ocean for the Atmospheric Correction <i>K.Masuda, M.Sasaki, T.Takashima, and H.Ishida</i>	45
Two Channel Analyses of the Aerosol Optical Properties Using NOAA/AVHRR <i>Akiko Higurashi and Teruyuki Nakajima</i>	51

Retrieving Aerosol Parameters from Advanced Visible and Near Infrared Radiometer (AVNIR) Multispectral Images of Mount Etna's Aerosol Plume <i>I.M. Watson and C. Oppenheimer</i>	55
--	----

III. Satellite Data Application to Environment

Using Double-channel and Double-angle ATSR Data in the Evaluation of Land Surface Temperatures <i>Jiemin Wang, Massimo Menenti, Akihiko Kondoh, and Donqi Liu</i>	59
--	----

Construction of GPS Vapor Information System for Interdisciplinary Studies <i>Akihiko Kondoh, Isao Naito, Ryu Otani, Tetsuya Iwabuchi, and Shin-ichi Miyazaki</i>	65
--	----

Study on the Minimum Representative Area on a Test Site <i>Hirokazu Yamamoto, Yoshiaki Honda, and Koji Kajiwara</i>	71
--	----

Retrieval of Cloud Physical Parameters on a Global Scale using NOAA/AVHRR <i>Kazuaki Kawamoto and Teruyuki Nakajima</i>	77
--	----

Diurnal Variation of Cloud Cover on 1996 from GMS-5 Images <i>Itaru Okada, Tamio Takamura, Kiyofumi Ogino, and Hideki Tamaru</i>	81
---	----

IV. Atmospheric Correction over Land and Ocean

(Invited Paper) Correction Methods for Aerosol and Thin Cirrus Effects on Remote Sensing <i>Yoram J. Kaufman</i>	89
--	----

Atmospheric Correction of Satellite Data Using Aerosol Information Derived from Multi-wavelength Lidar Observation <i>Mitsuo Minomura, Jianfei Ru, Hiroaki Kuze, and Nobuo Takeuchi</i>	102
--	-----

Cirrus Cloud Correction for Retrieval of Sea Surface Temperature by Satellite IR Measurements <i>Lisheng Xu, T. Takamura, G. Zhang, and J. Ding</i>	106
--	-----

Cross Calibration Between ADEOS/AVNIR and OCTS - Error Budget Analysis and the Results from the Field Campaign - <i>Kohei Arai</i>	112
---	-----

Bathymetric Mapping using Landsat TM - Case Study in Indonesia - <i>Katsutoshi Kozai and Winardi</i>	121
---	-----

(Invited Paper) Experiences in Atmospheric Correction for ADEOS/OCTS Ocean Color Data <i>Hajime Fukushima, Mitsuhiro Toratani, Yasushi Mitomi, and Toshimitsu Noguchi</i>	125
---	-----

Assesment of ERBE Scene ID by Using the Collocated AVHRR Data <i>Toshiro Inoue</i>	132
---	-----

Atmospheric Correction for Ocean Color Sensors : ADEOS/OCTS and POLDER <i>Sonoyo Mukai, Itaru Sano, and Kazuhiko Masuda</i>	136
--	-----

V. Algorithm of Physical and Statistical Models

(Invited Paper) Applied Mathematical Problems of Atmospheric Correction and Filtration of Multispectral Satellite Data <i>Oleg I.Smokty</i>	143
--	-----

Single- and Multiple-scattering Properties of Ice Crystals in 1.38 μ m Wavelength and Their Potential Applications in Satellite Remote Sensing <i>Lisheng Xu, T.Takamura, G.Zhang, and J.Ding</i>	151
---	-----

Effects of Adjacent Clouds to Satellite Fields of View on the Measurements of the Surface Reflectivity <i>T.Kobayashi, K.Masuda, and M.Sasaki</i>	157
---	-----

Sensitivity Analysis of Temperature - Emissivity Separation Relevant to the Atmospheric Correction <i>Masao Moriyama</i>	161
--	-----

(Invited Paper) A New Algorithm for Estimating Aerosol Optical Thickness from Satellite Image Data and Its Accuracy <i>Y.Kawata, A.Yamazaki, M.Imanaka, and K.Mouri</i>	165
--	-----

A Parameterized Model for the Atmospheric Correction of Satellite Data <i>Qiu Jinhuan</i>	171
--	-----

Snow Surface Bidirectional Reflectance Effects on Atmospheric Correction Based on Doubling-Adding Method <i>Satoshi Tsuchida</i>	177
--	-----

VI. Remote Sensing of Indonesian Forest Fire

(Invited Paper) Forest / Land Fire Impact in Indonesia <i>Muchlisin Arief and Bambang S.Tejasukmana</i>	183
---	-----

(Invited Paper)	
Relation between Continuity of Forest Fire and Forest Types in Indonesia <i>Haruo Sawada, Naoki Mitsuzuka, and Tomoyuki Ueda</i>	188
The Effect of Indonesian Forest Fire on Local Tropospheric Aerosol Optical Thickness by Using NOAA AVHRR data <i>Jianfei Ru, Mitsuo Minomura, Hiroaki Kuze, Nobuo Takeuchi, Akiko Higurashi, and Teruyuki Nakajima</i>	195
Climate-relevant Aerosol Parameters of South-East-Asian Forest Fire Haze <i>Wolfgang von Hoyningen-Huene</i>	201
 VII. Ground-based and Airborne Monitoring	
(Invited Paper)	
Lidar Measurements of Stratospheric Aerosol over Hefei, China during 1991-1996 <i>H.Hu, J.Zhou, and Y.Wu</i>	211
Lidar Measurements Synchronized with Satellite Overflights Acquired at 14.64N, 121.07E <i>L.dela Fuente, S.Dorado, N.Lagrosas, C.Enaje, J.Holdsworth, and M.Alarcon</i>	214
Climate Change and ENSO in Southern Thailand <i>Absornsuda Siripong and Phuwieng Prakhammintara</i>	228
Tracking Urban Planetary Boundary Layer of Hong Kong by Aerosol Monitoring <i>K.M. Leung, T.M. Mok, K.Y. Chan, A.H.P. Ho, C. N. Ng, J.C.L. Chan, and J.L. Gao</i>	242
Retrieval of aerosol Characteristics by Combining Ground-based and Airborne Measurements <i>S.Kaneta, T.Takamura, and N.Takeuchi</i>	250
An Attempt for a Ground Truth Validation of MOS-B Radiance Data <i>Wolfgang von Hoyningen-Huene</i>	254
Lidar Network for Observation of Asian Dust (Kosa) in Japan <i>T.Murayama, M.Abo, H.Adachi, K.Aoki, K.Arao, K.Asai, M.Fujiwara, R.Imasu, K.Kai, T.Kawahara, R.Koga, H.Kuze, S-A Kwon, A.Nomura, I.Matsui, Y.Saito, T.Sakai, K.Shiraishi, N.Sugimoto, and N.Takeuchi</i>	264
Preliminary Study on the Evaluation of Atmospheric Effect to Interferometric SAR Measurement <i>Kazuya Saito, Tamio Takamura, Kunihisa Takimoto, and Johta Yamamoto</i>	270

Measurement of Stratiform Cloud Liquid Water Path from Airborne Microwave Radiometer
Yozo Takayama and JACCS Aircraft Observation Group276

Observational Study on the Radiative Properties of Atmospheric Aerosols over China
G.-Y Shi, T.Nakajima, T.Takamura, T.Hayasaka, L.Xu, B.Wang, X.Jin, X.-B.Fan, R.-M.Hu, P.Zhang, L.-S.Zhang, X.-H.Wang, L.-X.Wang, and H.Zhang.....280

Atmospheric Aerosol Properties over Lunar Lake, Nevada Using the Ground Based Spectro-polarimeter
Tsutomu Takashima and Kazuhiko Masuda284

Continuous Observation of Aerosols and Clouds with Ground Based Lidars in Tsukuba, Japan and in Jakarta, Indonesia
Nobuo Sugimoto, Ichiro Matsui, Mego Pinandito, Ii Hydayat, Imam Rosananto, and Muharyan Syamsudin288

Satellite Workshop :
The Accuracy of Optical Thickness
Derived from Lidar Observation

January 23, 1998

Calibration of the Vertical Lidar Measurement of Tropospheric Aerosol Extinction Coefficients
H.Kinjo, H.Kuze, H.Matsushima, and N.Takeuchi295

H-S Method for Deriving Aerosol Extinction Coefficient Profile from Lidar Observation
Qiu Jinhuan299

Lidar Measurements of Tropospheric Aerosol over Hefei
Jun Zhou303

Diurnal Measurements of the Planetary Boundary Layer over Hong Kong Derived From Lidar Observations
K.M. Leung and T.M. Mok309

Lidar Monitoring of Atmospheric Aerosols in Seoul Using a Micro Pulse Lidar
Soon-Chang Yoon and Jae Guang Won315
